EDITORS

Ante Mandić is Assistant Professor of Sustainable Tourism at the University of Split, Croatia. He is Associate Editor of the Journal of Ecotourism, and the ExCo member and coordinator of Knowledge development at the IUCN World Commission for Protected Areas TAPAS. Personal web page: <https://antemandic.com/>

Anna Spenceley FRGS is a sustainable tourism expert with more than two decades of global experience and leadership roles in conservation and tourism organisations. She is Senior Research Fellow at the University of Johannesburg, and sits on the editorial boards of the Journal of Sustainable Tourism and Tourism Planning and Development.

David A. Fennell researches and teaches in the areas of ecotourism, tourism ethics, animal ethics and sustainability ethics. His research involves the use of theory from other disciplines (e.g., biology, philosophy) to gain traction on many of tourism's most persistent issues. He is the founding Editor-in-Chief of the Journal of Ecotourism.

AUTHORS

Martina Baučić is Associate Professor at the Faculty of Civil Engineering, Architecture and Geodesy in Split. Her primary field of work has been in geoinformatics and spatial analyses for various application domains for about 30 years. She co-led the elaboration of two climate change adaptation plans, cooperated on several other projects and has published several works on the same topic.

António José Bento-Gonçalves is Associate Professor at the University of Minho, Portugal and specialises in Physical Geography and Environmental Studies, with research focusing on topics such as wildland fires, natural hazards, geomorphology and soil erosion processes.

Lucas Berard-Chenu is Assistant Professor of Human Geography at the Department of Tourism, Culture and Hospitality of the Sino-European Joint Institute of Tourism and Culture of Ningbo University (China) and the University of Angers (France). He holds a PhD in Geography from the University of Grenoble Alpes (France) and much of his research is related to the development of tourism destinations and their adaptation to the impacts of climate change.

Anouk Bonnemains defended a thesis in tourism geography in 2015 at the University of Grenoble Alpes, on the adaptation of Tarentaise high-altitude winter sports resorts to global

change. She has completed several postdoctoral contracts on mountain territories at the Savoie Mont-Blanc University. In 2021, she joined the University of Lausanne as a substitute lecturer.

Neil D. Burgess is Chief Scientist at UNEP-WCMC, where he oversees the scientific quality of the work across the organisation and manages projects on biodiversity state and pressures and conservation needs on the ground. Neil Burgess serves as Chief Scientist at UNEP-WCMC, overseeing their scientific programme and bringing extensive experience in East Africa to his role.

O'Shannon Burns is a sustainability consultant and researcher, specialising in embedding regenerative principles into businesses, with a focus on climate action, conservation, environmental justice and sustainable travel and tourism. She is affiliated with Cornell University's Center for Sustainable Global Enterprise.

Hrvoje Carić, PhD, is an experienced researcher specialising in pollution auditing, risk analysis and environmental assessment, with a strong focus on sustainable development in tourism, community development, nature conservation and pollution prevention.

Hoi F. Cheu is Full Professor, School of Liberal Arts, University of Laurentian, and a theorist deeply interested in the philosophy of both arts and science. He is an interdisciplinary researcher and currently serving as the director of the Doran Planetarium.

Kei Wei Chia is Senior Lecturer at Taylor's University, Malaysia; specialises in tourism research with a focus on island tourism, community-based tourism, medical tourism, rural tourism, tourism management and sustainable tourism; holds a PhD from Universiti Putra Malaysia; and serves as Associate Director of the Centre for Research and Innovation in Tourism (CRiT) at Taylor's University.

Giles Davies is the founder of Conservation Capital, a firm that merges commercial finance with natural capital restoration, and has directed significant finance towards enhancing resilience in natural landscapes globally. He is also an experienced Chartered Accountant and holds non-executive director roles.

Holly T. Dublin is an experienced practitioner in sustainability, regeneration and conservation, particularly in Africa, with expertise in various areas such as community-based conservation, wildlife economies, and strategic planning. She currently advises IUCN ESARO and the International Institute for Environment and Development and is part of the Steering Committee of IUCN's Sustainable Use and Livelihoods Specialist Group.

Susanne Etti is Global Environmental Impact Manager at Intrepid Travel, a B Corp certified small group adventure travel company. Since joining in 2019, she has led the company to achieve industry-first milestones, such as becoming the first tour operator with verified science-based carbon reduction targets. She has authored an open-source document guide for travel businesses wanting to decarbonise and is a driving force in several industry alliances.

Eivind Farstad is Senior Research Economist at the Department of Mobility, Institute of Transport Economics – Norwegian Centre for Transport Research, Oslo, Norway. His research interests comprise tourism, shared mobility and sharing economy, leisure travel and environmental impacts, regional development, travel statistics, economic impact analyses.

Saulo de Oliveira Folharini is Postdoctoral Researcher at the University of Minho, Portugal, with expertise in geography, focusing on research topics such as soil loss, land use and land cover, ecosystem services, protected areas and remote sensing.

Hugues François, Research Engineer at Grenoble Alpes University/INRAE LESSEM, specialises in the study of ski resorts' adaptation to climate change and the assessment of ski piste snow reliability, with a focus on both qualitative and quantitative methods.

Richard Gauld is Director of Operations and Finance at Uneathodox, a Swiss non-profit organisation specialising in fostering collaboration and innovative ideas for the benefit of nature and communities, with prior experience in operations and audit management roles at the Luc Hoffmann Institute and the UK National Audit Office. He holds a PhD in Political Ecology from King's College London.

Furkan Gedik is Postgraduate Researcher at Çanakkale Onsekiz Mart University, focusing on research in global climate change, drought and water resources management, with prior education at Marmara University.

Emmanuelle George is associated with INRAE-LESSEM, focusing on mountain areas, ski resorts, climate change, and governance in transition processes.

Derek de la Harpe is an experienced professional with 40 years of expertise in the tourism industry, wildlife conservation, environmental conservation and accounting, currently serving as Head of Corporate Affairs and Risk Management at Wilderness Holdings Limited, overseeing the group's impact initiatives across nine African countries.

Jan Vidar Haukeland, a senior researcher and sociologist at the Institute of Transport Economics (TOI) in Oslo, Norway, specialises in nature-based tourism and various aspects of tourism and transport research.

Jasper Heslinga is Senior Lecturer and Researcher at NHL Stenden/ETFI (European Tourism Futures Institute) and Policy Advisor at OECD-OCDE. He specialises in understanding governance processes and the institutions that could help build resilient tourism destinations. He is also an expert in the field of tourism analytics and data science. He conducts research and gives advice with regard to tourism and recreation and the impacts on both landscapes and communities.

Donagh Horgan specialises in regenerative placemaking and socio-spatial transformation, working as a lab lead at the Urban Leisure and Tourism lab in Rotterdam, Netherlands and contributing to sustainable urban transitions at Inholland University of Applied Sciences and Erasmus University Rotterdam.

Asif Hussain, PhD, is Founding Director of the Sustainability and Resilience Institute of New Zealand, focusing on research in regenerative tourism, sustainable tourism, indigenous studies, infrastructure development, climate change, sustainability and resilience, with a strong commitment to community projects and social impact.

Jonathan Hutton plays a pivotal role at WWF International, where he provides guidance for conservation strategies across the extensive WWF Network of 8000 members. His responsibilities include developing critical initiatives to achieve impact and implementing safeguards to protect both nature and people.

Lap K. IU is a graduate of psychology at the University of Toronto. His research interest is cross-cultural mental health. Currently, he is a crisis responder for Crisis Services Canada in Toronto.

Nagathisen Katahenggam is Senior Lecturer at Taylor's University, Malaysia, specialising in tourism governance, particularly the politics of touristification in heritage cities in Asia. He also has a background in the meteorological field, where he is passionate about bridging tourism with climatological concerns.

Iris Kerst is Program Manager of the Expertise Network Sustainable Tourism and the Urban Leisure & Tourism Lab Rotterdam. In her job she connects researchers, students, entrepreneurs, businesses and residents to each other, with the aim to build on future cities with a more sustainable tourism future.

Shaheed Khan is Head of Research, Training, and Advocacy at Dharthi NGO, focusing on the intersection of environment, forests, communities, and tourism. Khan has a diverse academic background including Tourism Management, Strategy and Leadership.

Michael Ngugi Kimani is an expert in remote sensing and works at the Regional Centre for Mapping of Resources for Development (RCMRD) in Nairobi, Kenya.

Chloe King, a marine conservationist and tourism development expert, is Director of Stewardship at Solimar International and a PhD candidate at the University of Cambridge, focusing on regenerative tourism in the Galápagos Islands.

Jeroen Klijs is Professor of Social Impacts of Tourism. Via the professorship, his ambition is to help professionals in tourism destination management choose, design and evaluate interventions that improve the social and economic impacts of tourism.

Ko Koens is Professor at Inholland University of Applied Sciences and Associate Professor at Breda University of Applied Sciences. His research focuses on New Urban Tourism and striking a balance between visitors and locals in such a way that tourism and social transformation can go hand in hand.

Jeetesh Kumar, Senior Lecturer at Taylor's University in Malaysia, focuses on research in Economic Impacts, Economic Modelling, MICE, Medical Tourism, and Behavioral Studies; is associated with the Centre for Research and Innovation in Tourism (CRiT); and leads the Responsible Tourism for Inclusive Economic Growth hub within the Sustainable Tourism Impact Lab.

Ho Hon Leung, Professor of Sociology at SUNY Oneonta, New York and adjunct professor at International Business University, Toronto, specialises in sociology, with research interests in ethnic relations, urban studies, architectural sociology and comparative aging. He has a strong publication record and is a co-founder of 4C5M Studio, an independent research centre.

Tristan Loloum is a social anthropologist specialised in the study of energy, the environment and tourism. His research on energy and society explores the role of culture and politics on the public understanding of power infrastructure and climate change.

Tiago Alexandre Ribeiro Marques holds a degree in Geography and Planning as well as a Master's degree in Risks and Civil Protection, both earned at the Universidade do Minho. His Master's thesis focused on 'the simplified forest register'.

Leona Matotek is a geography student specialising in Heritage and Tourism at the Faculty of Science in Zagreb, with a keen interest in sustainable tourism and active involvement in Student Geography Associations in Zagreb and Europe.

William Morin is an Indigenous artist who also teaches Anishinaabek actively, including Indigenous Studies, in Sudbury. He is also a member of Laurentian's planetarium team, teaching Anishinaabek language and astronomy to students and public.

Artie Ng received his doctoral degree from the University of Glasgow, UK. He is currently Inaugural Dean of International Business University, Toronto, Canada. His teaching and scholarly interests are financial regulation and compliance, intellectual capital, sustainable finance and investment, and policy for global sustainability.

Emmanuel Nkurunziza is a remote sensing expert affiliated with the Regional Center for the Mapping of Resources for Development (RCMRD) in Kasarani, Nairobi, Kenya.

Jorge Novais holds a Master's degree in Geographic Information Systems from the Universidade do Minho, Portugal, with primary interests in GIS related to Remote Sensing, Territorial Planning, Environmental Sustainability, and Photogrammetry.

Lidija Petrić is Full Professor at the Faculty of Economics, Business and Tourism, University of Split, Croatia, specialising in tourism economics, development, destination management and cultural tourism, with a strong involvement in international projects and memberships in various esteemed organisations.

Emmanuel Salim is Assistant Professor at the University of Toulouse Jean-Jaurès and an associate researcher at the University of Lausanne. His work focuses on tourism and climate change. He is particularly interested in climate change adaptation and mitigation. He also works on outdoor recreation issues, mainly in mountain areas, and on the perception of environmental change and its impact on recreationists' substitution behaviour.

Faize Sarış is Associate Professor specialising in hydroclimatology at Çanakkale Onsekiz Mart University, where she teaches and conducts research on rainfall variability, basin-based drought analysis and bioclimatic variability in Turkey.

Mehmet Şeremet is Reader in Human Geography, with a PhD from Plymouth University, specializing in tourism geographies and critical topics in geographical education, while also leading sustainable tourism projects in Turkey and serving as a co-editor for Turkish Geographical Review and Geographies, Planning & Tourism Studies journals.

Sara Catarina Gomes da Silva is Researcher at the Communication and Society Research Center (CECS) and a faculty member in the Geography department at the University of Minho in Portugal, specialising in tourism, geographic information systems, and urban and territorial planning, with previous involvement in the CLICTOUR project promoting climate change-resilient tourism.

Bert Smit is Senior Lecturer and Researcher at Breda University of Applied Sciences. His research focuses on sustainable destination design and sustainable tourist experiences.

Jonathan J. Smith specialises in using technology to process geospatial data for applications in planetary and human health, working with remote sensing, GIS and machine learning models to address challenges related to biodiversity, soil carbon, deforestation and public health, with previous experience at UNEP-WCMC and collaborations across western and southern Africa.

Hugh J.W. Sturrock is Chief Science Officer and co-founder of Locational, where he utilises spatial data and cloud-based algorithms to address problems. He specialises in spatial modelling and machine learning, and has extensive experience collaborating with organisations and working in various countries.

Thanam Subramaniam is Senior Lecturer at Taylor's University in Malaysia, specialising in Tourism Marketing, Tourist Behavior, Tourism Experience, Eco-Tourism, Economics and Sustainability, with an emphasis on community engagement and research leadership.

Freedra Maria Swarna M is Director of Dharthi NGO and a pivotal member of the Karnataka Ecotourism Development Board, specialising in sustainability, conservation science, and ecotourism, with notable contributions to research and policy development in these areas.

Lauren Verheijen is Lecturer and Researcher at Breda University of Applied Sciences. She specialises in (educating for) sustainable development in relation to business ethics.

António Avelino Batista Vieira is Associate Professor at the Department of Geography, University of Minho, specialising in geomorphology, geomorphological heritage, geotourism, geospatial technologies for landscape evolution, coastal analysis and post-fire soil erosion, with active involvement in various professional associations.

Izidora Marković Vukadin is Senior Researcher at the Institute for Tourism in Zagreb, focusing on sustainable tourism, particularly in relation to the management of sustainable tourism, the impact of tourism on protected areas and the environmental impact of tourism.

Nicole Wargo is a graduate of Harvard University Extension School, specialising in sustainability and focusing on tourism and communities, while actively contributing to sustainability initiatives in Clark County, Nevada, and collaborating with Dazzle Africa on wildlife conservation and community resilience in Zambia.

Megan Epler Wood is Managing Director of the Sustainable Tourism Asset Management Program (STAMP) at Cornell University, specialising in sustainable tourism, and she also leads the international consulting firm EplerWood International (EWI), known for designing sustainable tourism development projects in 40 countries.

Mira Zovko has a background in biology and currently focuses on tourism sustainability in the Ministry of Tourism and Sport, following extensive experience in environmental and public health institutions.
